

MARPOSS

Marposs Group Policy for the transport of lithium-metal and lithium-ion cells and batteries

Marposs adopt the measures requested by the international and national transport regulations and in particular stated in Section 38.3 of UN Manual of Tests and Criteria, for the secure transport of lithium-metal and lithium-ion cells and batteries that may be contained in or packed with MARPOSS equipment.

We encourage the strongest cooperation from our suppliers of lithium cells and batteries to obtain the necessary documentation such as the summary report in accordance to the sub-section 38.3 of UN Manual of Tests and Criteria.

We are committed to cooperate with our customers and share with them, to the possible extent, the relevant documentation upon request.
