**MANUAL RING**

- Electronic manual ring gauge with full-bridge (LVDT) transducer for checking outside diameters of shaft and pin type parts in the range 4 to 100 mm (0.16" to 3.98"). Particularly suitable to perform measurements close to a shoulder.

- It is composed of a ring body and standard interchangeable nosepiece; within its range of use each ring is completely retoolable by changing the nosepiece and the contacts.

- Accurate, rugged and reliable, needs no maintenance and has practically no operating costs.

- Thanks to its outstanding qualities, it can be used in the most difficult working conditions without any affect to its technical characteristics.

- It can be used both directly on the workpiece and as a simple fixture using the optional support.

- The measurement value can be displayed on the TESTAR E18, E4, E4N and, through the Gage Box data acquisition system, on the E9066s Industrial PC.

The M4 comes with various C measurement point distance values that allow great flexibility in the measurement position. The C dimension comes in 2.5 mm for close to flange measurements, in 6 mm for normal measurements and in 12 mm for bottom measurements.

### TECHNICAL CHARACTERISTICS

</tbody>
</table>

**N.B.** The above measuring range cannot be covered with only one nosepiece, but a dedicated nosepiece is necessary for each diameter to be measured (see How to Order a Finished Ring).
**How to Order a Finished Ring**

**Type of connector:**  
- **S3** = Lumberg S3 - 3 pin - used with E4 and E18  
- **SV50** = Lumberg SV50/6 - 5 pin - used with E4N and Gage Box

**Type of handle:**  
- **B** = Basic without handle  
- **A** = Axial Handle

**Measurement unit:**  
- **M** = Millimeter  
- **I** = Inch

**Distance (C) from the edge of the nosepiece to the contacts (mm):**  
- **C** = 2.5 / 6 / 12

**Example:** Need to order an M4 with **C**=2.5 mm, carbide contacts, E4N connector, without handle, max. ø 38.735 mm (1.525 inch), min. ø 38.710 mm (1.524 inch).

| M4  | 2.5 | C | SV50 | B | M | 38.735 | 38.710 |

**Components and Accessories**

- **A** = **Ring Body**  
- **B** = **Semi-Finished Nosepiece**  
- **D** = **Contact**  
- **E** = **Contact Extension**

### STAND

The Stand (same as M1) is designed to enable the use of the M4 electronic ring gauge as a bench gauge. It can accommodate the M4 range 4 to 50 mm in both versions with radial and axial cable output; the M4 range 50 to 100 mm can be accommodated only in axial cable output version. It is particularly helpful when quantities of work pieces with close tolerances are to be gauged.
