# AFTER SALES SERVICES

One of the biggest challenges for **maintenance people** is not only keeping equipment operating, but also to attain:

**MAXIMUM EQUIPMENT UPTIME**  
**BEST PERFORMANCE**  
**QUALITY RESULTS**  
**REDUCE COSTS**

Marposs has at your disposal a **team of specialized engineers**, to ensure continuous, perfect performance of Marposs products and applications solutions installed in your production facility, with:

- **ON-SITE** interventions to keep the operational continuity of installed equipment and ensure availability and reliability over the years.
- **DEPOT REPAIRS** in our Service Centers with qualified engineers and **Marposs original spare parts** in order to guarantee the quality of your manufacturing process.

Do you know that productivity and quality are key factors that depend on **how the maintenance is performed?**

A **maintenance program** is the most effective way to reduce the likelihood of failure or reduced functional capability. Evaluate the performance of measurement equipment over time is fundamental to verify the reliability of measurements results and the quality of product and process.

With the **Marposs Care** service activities we can help you on that!

**PREVENTIVE MAINTENANCE**

**CUSTOMER TRAINING**

**CALIBRATION**

**PROCESS IMPROVEMENT**

Marposs service team can provide **analysis of the present performance** and possible **improvements**

By signing a Maintenance Contract with us, you gain valuable advantages beyond special pricing and spare parts planning. We proactively monitor your Marposs equipment, assess its current condition and work with you to define corrective actions in advance, helping reduce the risk of breakdowns caused by wear, aging, or component deterioration.

Marposs products and applications are manufactured using **high-quality components, backed by over 75 years of industry experience and expertise.**

Therefore, in order to **guarantee the quality of your manufacturing processes**, always use Marposs original spare parts when replacing either mechanical or electronic components.
