

# P3DME

## ***FLEXIBLE POST-PROCESS MEASUREMENT SYSTEM***

# MARPOSS

## Description

Increased production and real-time quality control are key elements of any industrial process. The **P3Dme** electronic amplifiers connected to the Marposs measurement heads represent a flexible, practical and reliable solution for checking parts immediately after they have been worked.

**P3Dme** units enable users to check the state of the machining process and provide immediate compensation information to the machine tool. **P3Dme** is a very compact gauge, equipped with a cover lens touch screen, that can be easily installed on the machine or a dedicated measurement bench. The new user interface has been designed to be intuitive and user friendly in order to simplify the day-to-day production operations.

**P3Dme** and Marposs measurement heads have been designed for use in working environments in contact with coolants and other aggressive coolants.

## Benefits

- Guarantees that the processed parts are within the production tolerance limits
- Optimizes the cycle times
- Enables the machine tool compensation
- Immediate return on investment through increased productivity
- Possible interface with various industrial protocols
- Easy integration with the machine PC

## Typical applications

- Post-process measurements on smooth and grooved parts
- Through-feed measurements (centerless or dual disc grinders)
- Upgrading of E3M applications

## P3Dme units

Flexible, user-friendly and sturdy. These are the intrinsic features of P3Dme. The unit can be installed outside on the machine tool or integrated into a PC via dedicated Human Interface.

*P3Dme with fixing bracket*

*P3Dme Stand Alone*

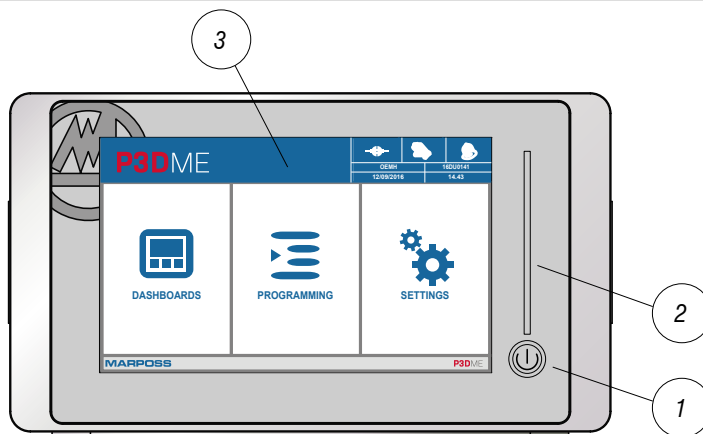

*P3Dme with Remote Panel*

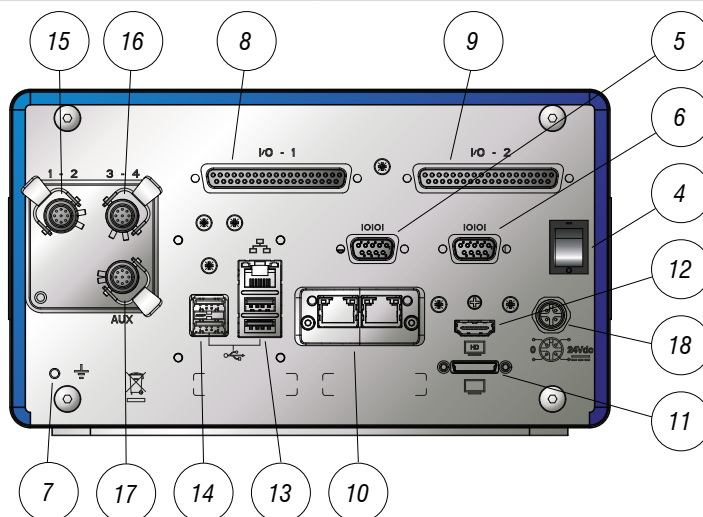

STRUCTURE	Stand alone or with remote panel
DISPLAY	7" (800 × 480) capacitive LCD
CHANNELS	2 or 4 channels <i>connect Marposs LVTD or HBT type heads</i>
OPTIONAL CHANNEL	Analogue current (4-20 mA) or voltage ( $\pm 10$ V DC) channel
MEASURING CYCLES	<ul style="list-style-type: none"> <li>• Post-process</li> <li>• Centerless/Double Disk</li> <li>• Bars</li> <li>• Grooved parts</li> </ul>
MEASUREMENT RANGE	Depending on the type of connected head: $\pm 250 \mu\text{m}$ , $\pm 500 \mu\text{m}$ , $\pm 1000 \mu\text{m}$ , $\pm 2000 \mu\text{m}$ Wide range (25.4 mm)
OPTIONS	Machine compensation Data log Pin-to-pin upgrade of E3μ «Human interface» for machine PC
POWER CONSUMPTION	Maximum 20 W without retraction option Maximum 75 W with retraction option
MACHINE LOGIC INTERFACE	24 Vdc opto-isolated (Sink, Source) I/O Profibus DP - Profinet Sercos III - Ethernet IP EtherCAT - Others on request
PROTECTION DEGREE (Standard IEC 60529)	IP54 (front panel) IP40 (rear panel)
WEIGHT	approx. 2.7 kg
WORKING TEMPERATURE	$5 \div 45 \text{ }^{\circ}\text{C}$ ( $41 \div 113 \text{ }^{\circ}\text{F}$ )
STORAGE TEMPERATURE	$-20 \div 70 \text{ }^{\circ}\text{C}$ ( $-4 \div 158 \text{ }^{\circ}\text{F}$ )
ELECTRIC SAFETY STANDARDS	EN 61010-1
EMC STANDARDS	EN 61326-1

## Front

1	ON/OFF switch
2	LED status bar
3	7" touch-screen panel - user interface

## Back

	Connector	Function
4	ON/OFF	ON/OFF switch
5	RS232 (lh)	Reserved
6	Serial Port (rh)	RS232 or RS485
7		Functional earth stud (M4 stud)
8	I/O - 1	Cannon 37 pin opto-isolated 24 Vdc connector
9	I/O - 2	Cannon 37 pin opto-isolated 24 Vdc connector
10	FIELDBUS	Connection to fieldbus I/O
11	Panel	Remote panel
12	HDMI	Reserved

13	NET 10/100	Ethernet HOST 10/100 Mbps via RJ45 connector
14	USB	USB connection ports N. 4 ports, Type A connector, 2.0 HS, I <sub>max</sub> = 500 mA, speed 480 M/bits/s, max. length of connection cable = 4.5 m
15	1 - 2	Head connector (1-2 transducers)
16	3 - 4	Head connector (3-4 transducers)
17	AUX	Analogue current (4-20 mA) or voltage (±10 V DC) input connector
18	M12	Power supply SELV type 24 V dc (-15% / +20%)
